representing radio signal environment in a sub-area corresponding to said location data to said portable device, and wherein said portable device monitors received radio signals corresponding to said data representing radio signal environment to detect a change in location of said device (col 4 lines 50-65).

Regarding claims 2, 7, Sollee teaches a system/portable device wherein said portable device uses said characteristic data and said radio signals corresponding to said radio signal environment to update said location data (col 4 lines 11-36).

Regarding claims 3, 8, Sollee teaches a system/portable device wherein said device is arranged to transmit said location data to a computer in association with other data and wherein said device transmits said updated location data in association with said other data (col 3 lines 59-67, col 4 lines 1-11).

Regarding claims 4, 9, 12, 15, Sollee teaches a system/portable device wherein said portable device signals said computer to provide updated location data if said device determines that it has changed location (col 4 lines 11-49).

Regarding claims 5, 10, 13, 16, Sollee teaches a system wherein said portable device signals said computer to provide an increased rate of updated location data if said device determines that it has moved (col 1 lines 47-58).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Couaillet (US Patent 6,768,719 B1) disclose method and apparatus for mobile assisted detection of a transmission fault on the ABIS interface of a mobile telecommunications network
